

BCQG Block Party

Disappearing Strip Block

August 2017

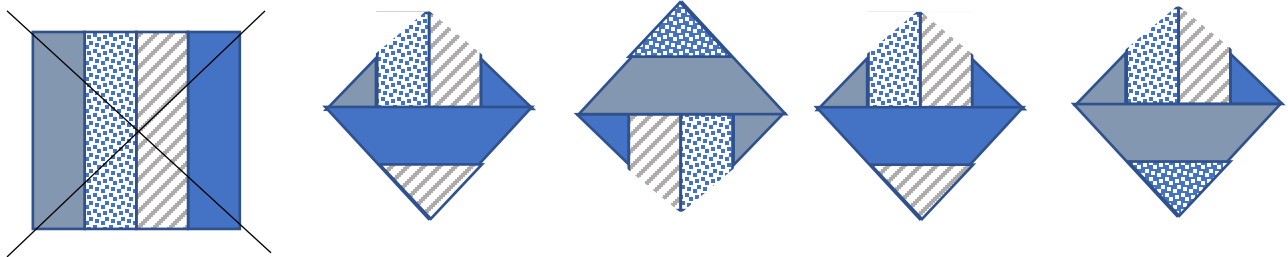

For this block you will need four coordinating color cut in $2\frac{1}{2}$ " strips.
Sew the four strips together. They should measure $8\frac{1}{2}$ " across.
Cut the strips into $8\frac{1}{2}$ " squares.

Taking two of these squares, and with right sides together, lay one down going horizontal and the other on top going vertically. Sew around all four sides.

Cut the square diagonally, twice. You will now have four squares.

I arranged my block like this, but you can experiment and come up with different settings. Have fun with it!
